

Senior Full Stack Developer

full time, m/f/d

The challenge

- Build delightful features that make it easier to run a trucking business
- Create rich experiences for construction companies that bring unparalleled innovation to their supply chains
- Take ownership of your own projects and bring them to fruition

The benefits

- As an early employee you will have a huge impact on the product and experience a growing startup
- A team with expertise in Complex Optimization Problems, User Experience, Product and Software Development as well as Business
- Work with the latest technology in a dynamic environment
- We're highly motivated and flexible
- Having fun is part of the job

Our current stack

- Vue.js, Ruby on Rails, Postgres, Redis, Docker, AWS, GitLab, MetaBase
- Comming up: hot new technologies like Elixir, Go, TensorFlow, and Keras.

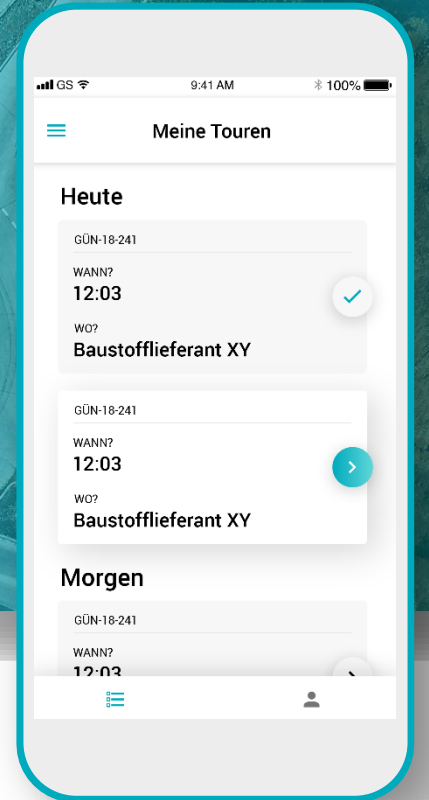

That's you

- Profound experience in software development and keen to learn more
- Rock solid in front- and/or backend development using frameworks like Vue.js, Angular & React or RoR & Phoenix or equivalent experience
- Experienced with Docker, micro-service architecture, and Postgres (or equivalent experience)
- Ideally, knowledge of DevOps and working experience with AWS
- You deliver value for our users within our agile environment
- Open minded, positive and proactive team player who is passionate about their craft and up for a challenge

kamioni

Digital Logistics.
Easy & efficient.

Join Kamioni, a Delivery Service for construction materials & more

Bulk goods logistics is the second largest transportation market in the world. Yet it is highly fragmented and inefficient, bearing an untapped potential for digitization.

We at Kamioni make bulk goods logistics easy and efficient by connecting supply and demand on a single platform.

For this, we develop state of the art technology to coordinate the involved parties and let them benefit from network effects and transportation data mining.

We're starting out with the construction industry by bringing construction companies, freight forwarders & material suppliers together to increase truck utilization and speed up construction projects. By this we relieve people from mundane tasks and help them make better use of our planets resources.

Become part of our team and join our mission to accelerate the transition to sustainable and efficient logistics!
